

# SCINTOMICS

Global Radiopharmacy Technology

## WHAT 'NEW SCINTOMICS' STANDS FOR

1

### Innovation and Creativity is our Leitmotiv

„ Functionality, performance and consistently high quality are the universally valid key parameters of engineering, no matter whether you develop a sports car or medical appliances. This is the benchmark and what our partners and clients can judge us by. SCINTOMICS significantly increased investment in research and development. Within the next month SCINTOMICS will launch new and innovative products for meeting the needs for specialized solutions “  
(Harald J. Wester, Advisory Board Member)

2

### Quality, Support and Service

„ Our new Management Philosophy is also designed to ensure the best possible quality, support and service for our partners and clients. SCINTOMICS undertook major efforts and investments to offer something that is meaningfully different – different in a manner that is fundamental “  
(M. Conze, Advisory Board Member)

3

### Marketing and Local Presence

„ With the new upcoming product generations we have the ideal platform to uniquely combine innovation with entrepreneurial spirit of a high tech company. We will further increase our presence in the global market in partnership with our local representatives in different parts of the world “  
(B. Conze, Advisory Board Member)

4

### Visions, Research and Practice

„ New routes to new goals: we are going to complement our new upcoming instrumental product portfolio by new radiopharmaceuticals and innovative chemical methods. This is one of our outstanding strengths, and we are dedicated to put it into action. In sharing knowledge in every part of the process, we will put excellence and innovation into practice “ (Hans-J. Wester, CEO)
